

Equipment

- Automated Electronic Defibrillator (AED)**
- Automatically assess and recommend defibrillation

Airway Box

- Contains intubation equipment, supplies, and medications
- Stocked and maintained by Inventory and Logistics and Pharmacy
- Deployed on all code carts and specific high use areas
- Facilitate the placement of artificial airways

Code (Arrest) Cart

- Portable, locked carts
- Equipped for age specific patient populations who have experienced a cardiopulmonary arrest
- Adult Cart is located in all units except the intensive care nursery

Code Blue Medication Box

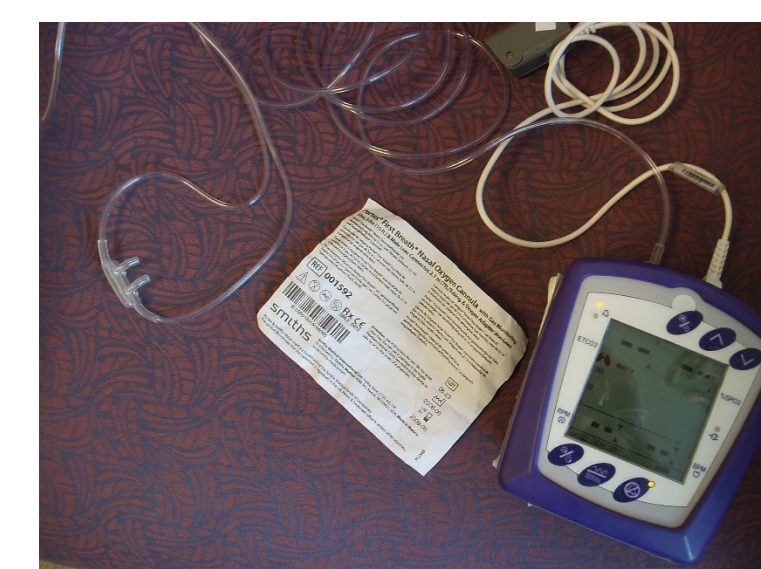

- Spare locked box of medications used commonly in code blue response
- Brought to every adult and pediatric code blue in the event that the number of doses of medications administered exceeds that supplied on the code cart

Difficult Airway Cart

- Provide video laryngoscopy, bronchoscopy, and supplies to assist teams in securing an artificial airway

End Tidal CO2 (ETCO2)

- Monitoring device used to verify placement of airways into the trachea and to assess effectiveness of cardiopulmonary resuscitation

Life Safety Backpack

- Locked portable backpack carried by the Life Safety RN containing supplies and medications needed for an emergency response

Portable Suction Unit

- Battery powered portable suction units maintained in all code cart emergency equipment areas

Respiratory Care Emergency Kit (Tote)

- Adult and Pediatric – Kit of supplies and equipment intended for first responders to maintain airway and ventilation of patients in respiratory failure.
- The tote is deployed in all emergency equipment areas, medication carts within patient units, and other high use areas

Surgical Airway Cart

- Airway cart maintained in the adult critical care units specifically for emergent surgical airways, maintained by the respiratory care dept.

ZOLL R Series Defibrillator

- Primary defibrillator maintained in all inpatient and ambulatory care areas.
- It is used as both a first responder AED, and once the Code Team arrives converted to an Advanced Life Support defibrillator
